

CURVE

SAUNA HEATER

High quality at a lower price

Introducing the new Curve sauna heater from Tylö for the residential market, Curve has been developed with high Tylö standards in mind, but comes equipped with a slightly different heater core. By taking this measure, we are able to set a lower consumer price compared to other sauna heaters in the Tylö product line. The Curve sauna heater is available in two different versions – one 6kW and one 8kW and comes with a three-year warranty and is equipped with a possibility to single or multi-phase electric connections.

Model	Output (kW)	Sauna volume (m³)	Suitable control panel	Weight of stones (kg)	Size in mm (HxWxD)
CURVE 6 (Art. 6100 1043)	6	4-8	built-in	14	571x483x243
CURVE 8 (Art. 6100 1044)	8	6-12	built-in	14	571x483x243
